

EDUCATION

Lahore University of Management Sciences (LUMS) | BS Computer Science

Sept 2018- May 2022

Relevant Courses: Advanced Programming, Algorithms, Software Engineering, Object-Oriented Programming, Operating Systems, Blockchain, Computer Networks, Network Security, Human Computer Interactions (HCI), Electrical Engineering (EE)

EXPERIENCE (6 years)

Conduit (aka FleetGlue) | Senior Software Engineer (Frontend Focused) & Team Lead

May 2025 – Present

NextJS 15 App Router, ReactJS, TypeScript, TailwindCSS, ShadCN, TanStack/React Query

- I am team lead for the conduit.inc project in the US, working remotely from Pakistan.
- I am leading an incredibly complex application for factory robot automation that is currently working in several large factories in the US.
- Leading a UI overhaul, already completed a migration of the entire codebase away from React 17, NextJS 12, GeistUI & styled-components to React 18, NextJS 13, TailwindCSS, and ShadCN.
- Enabled super-fast-paced development through a combination of:
 - Agentic development
 - Moving from git to jujutsu
 - Using stacked PR workflows
- Increased cadence of production deployments from twice a month to twice a day.

Beyond ONE | Senior Software Engineer 1 & Team Lead

May 2025 – Present

NextJS 15 App Router, ReactJS, TypeScript, TailwindCSS, ShadCN, TanStack/React Query

- I am team lead for the VCR (Virgin Connect Roam) project under which I was tasked with rebuilding, for better performance and SEO, the [VCR website](#) from scratch which was previously built in Flutter Web. This seemed daunting and close to impossible given the time-frame of 3 months but I achieved it, hence helping the company reach quarterly revenue goals.
- The technical requirements for this website dictated a near-perfect lighthouse performance and SEO score which I achieved using NextJS static site rendering coupled with Cloudflare Edge CDN.
- Using TypeScript, TanStack Query, Orval,, and ShadCN I built not just a web app but a common base that future company projects and teams use to bootstrap their projects.

Metal | Founding Full Stack Frontend-Heavy Engineer E4 🔗

May 2023 – February 2025 (~2 years)

NextJS 14 App Router, ReactJS, TypeScript, TailwindCSS, React Query, Orval, Zustand, Playwright for E2E Testing, Jest & React Testing Library for Unit Testing, NestJS, PostgreSQL, Sentry, GitHub, CI/CD, Vercel, AWS

- Metal (aka Apollo Group) is the next project of the team of Airlift, which was Pakistan's largest startup that raised \$120M in capital from investors such as Techstars and Sam Altman.
- Within 9 months of joining, I was promoted two times due to exceptional performance and granted large equity in the business.
- Being the first software engineer hired by the company, I have led the launch of 2 MVPs, the first being a GPT-based chatbot webapp and the second being a React NextJS 14 web application with a NestJS-PostgreSQL backend.
- I am currently leading a team of 5 frontend engineers and contributing as a backend engineer. I'm also in charge of roadmap execution, planning, assigning DRIs, deadlines, and feature delivery.

Educative | Full Stack Software Engineer 🔗

Aug 2022 – April 2023 (9 Months)

NextJS, ReactJS, TypeScript, Redux, TailwindCSS, Redis, Python Flask, Selenium, Google Cloud Platform (GCP), Google Cloud Datastore, Jest, React Testing Library, GitHub, CI/CD, JIRA, Jenkins

Educative was ranked as one of the fastest growing companies of North America. I was part of the largest team (Learner Experience) that ships features to the primary customer base of the [Educative.io](https://educative.io) website (learners & enterprises) used by millions of users. The current landing pages: educative.io and devpath.com were also built by me. I have worked on features such as search, enterprise features, and the Projects feature. I left Educative when the founder of the largest startup in Pakistan (Airlift) reached out to me to be the founding engineer in his next startup (Metal).

The Institute of Emerging Careers (IEC) | Lead Software Engineer 🔗

Dec 2021 – July 2022

AWS EC2 / AWS SES / NodeJS / ExpressJS / ReactJS & React Context API / EJS (Templating) / TailwindCSS / Babel (Browser Compatibility) / Redis / Bull / Mocha & Chai (Testing) / Nginx (Reverse Proxy) / Sequelize ORM / Git & Github

Scalability-focused student-acquisition-system designed for low-computer-literate students from non-urban areas | Enabled company to onboard a new cohort every 3 weeks which was not possible before | As a 6-month exit strategy, I built and trained a team of engineers to take over after I left.

Open Data Pakistan | Team Lead, Software Engineer 🔗

Aug 2021 – Dec 2022

Open Source CKAN Project / Jinja2 / Python / Flask / Bootstrap / PostgreSQL / AWS EC2 / Git & Github

Pakistan Government's official data portal. Built on the Open Source [CKAN](#) project | Managed team of 3 developers | Led upgrade to CKAN 2.9

PROJECTS

- **NextJS Portfolio Website & Blog:** rohanhussain.com
- **TripBazar.pk:** A website that's a search engine for local tours in Pakistan.
- **Blockchain Messaging App (Python):** Received RAship offer from a professor at a German University in Blockchain after this.

TECHNOLOGIES

- **Languages:** Typescript/JavaScript, Python, PHP, C, C++
- **Frameworks, Libraries, & Tools:** NextJS 14 App Router, ReactJS, Server Components, Redux, Zustand, Context, ExpressJS, NodeJS, NestJS, Flask, EJS, Jinja2, Wordpress, CKAN
- **Databases & Tools:** MySQL, MariaDB, PostgreSQL, MongoDB, Google Cloud Firestore/Datastore, TypeORM, Sequelize ORM
- **Cloud & Deployment Tools:** AWS EC2, S3, SES, IAM, VPC, Amplify | Nginx, Apache | Vercel
- **Testing:** Jest, React Testing Library, Playwright, Mocking, Selenium,
- **Other Tools:** Figma Prototyping, HCI | Adobe After Effects, Illustrator, Photoshop, Microsoft Word, PowerPoint, Excel, Sheets

AWARDS & EXTRA CURRICULARS

- Listed in Book "101 Brilliant Students of Lahore" by FAIDA Foundation in 2016
- Director of IT & Creativity at the LUMS Media & Arts Society (LMA) & FILUMS International Film Festival (2019-20)
- Assistant Director HumAahang – A society for interreligious harmony
- Senior Humorous Declamation Speaker at the Government College University Lahore Debating Society (GCU DS)

LANGUAGE PROFICIENCY

- English (Fluent), I was editor of a literary blog in high school
- Urdu (Fluent) | Punjabi (Conversive) | Persian (Beginner)

INTERESTS

Urdu-English Literature, Urdu Modern Fiction & Modern Poetry | Philosophy | Art (Vector Illustrations) | Languages
